TEXICELL

THE ONE-SIZE-FITS ALL SOLUTION.

The exclusive Airlaid technology, using air instead of water in the production process of pure cellulose fibres, together with the special three-dimensional weave, provide the Texicell products with an extraordinary absorbency capacity and strength, even when wet.

These specific features make Texicell the ideal solution for multiple contexts of use.

3 BENEFITS 1 PRODUCT

The Texicell dry paper range uses Airlaid technology to deliver outstanding all-round performance:

THE TOUGHNESS OF FABRIC

With a cloth-like texture and the capacity to be reused up to 9 times, Texicell is truly unique.

THE ABSORBENCY OF A SPONGE

A special technique makes Texicell paper able to absorb up to 7 times its own weight.

THE VERSATILITY OF PAPER

From industrial kitchens, beauty salons and rest homes to hospitals, gyms and workshops, Texicell is a perfect solution.

USE

RINSE

RE-USE...UP TO 9 TIMES!

TEXICELL CERTIFICATIONS

Texicell products are certified PEFC, the forest certification that guarantees the correct environmental management of forests from which cellulose comes.

Products with this label are certified OK compost INDUSTRIAL, the TÜV Austria-owned and Europe-wide recognised label that guarantees that a product, including components, inks and additives, is biodegradable and compostable in an industrial composting plant in accordance with the requirements of standard UNI EN 13432.
